UPGRADES/CHANGES FROM 2015

New Adventure model for 2016!!

REASONS TO UPGRADE FROM RENEGADE EXPAT

Jamis Adventure Reynolds 631 double-buttet SST chromoly frame

Shimano 105 group including crankset

Shimano Center Lock Ice Tech rotors

Formula sealed bearing Center Lock hubs

TRP HYRD cable actuated hydraulic disc brakes

TOP 5 THINGS YOU NEED TO KNOW

Shimano 11-Speed 105 is the Shimano work horse and incorporates many of the trickle down benefits that were developed for Dura-Ace 9000 series and integrated into Ultegra 6800 series. Benefits include reduced shifting effort, better braking from the hoods, more control based on better ergonomics and durability, enhanced while dropping almost 15 grams from the prior generation 105.

The TRP HYRD rider tested cable actuated internally routed hydraulic disc brake with Shimano Center Lock Ice Tech 160mm front and 140mm rear rotor will provide the stopping power needed for those long, demanding days

The Alex ATD470 rim with TCS (Tubeless Compatible System) features a tubeless ready rim with a reinforced rim bed for the added disc brake forces. This wheelset is ready for your next adventure

Tom Ritchey has done it again with the EVOMAX bar. This time TR has taken his shallow drop (120mm) and short reach (73mm) bar and added a 12° flare at the drop for a wider bar that increases stability, and clearance between your forearm and the top bar while hitting the roughest terrain.

Clement has not only taken CX by storm, they are now focused on the Adventure market. The X'Plor USH is a 700 x 35 mm adventure tire USH is designed for mixed conditions. The combination of firm center ridge and diamond-shaped side knobs provide low rolling resistance and great cornering control.
